What We Do

We (www.haystream.com) help our clients unlock the value of digital transformation and optimize their business by implementing cloud-based strategies, and deploying Artificial Intelligence (AI), Machine Learning (ML), and Natural Language Processing (NLP) solutions. We combine deep business expertise, process re-engineering, and the right technologies to help our clients achieve their business objectives.

What You Will Do

You will be responsible for developing data architecture, designing logical data models, developing deployment strategy, identifying tools to support these functions to produce our client's desired business outcomes.

Objectives of This Role

- ▶ Define the optimal data model to support dynamic and growing financial business with a complex technology footprint.
- ▶ Analyze Current state and gap analysis of client's data architecture, evaluate existing data capabilities, map capabilities, and determine suitable modifications to better serve the needs of the business
- ▶ Recommend target architecture for Data layer
- ▶ Participate in data governance discussions/solution review boards
- ▶ Collaborate with internal and external resources to ensure complete context for data requirements.
- ▶ Research and evaluate sources of information to determine possible limitations in reliability or usability
- ▶ Provide direction, training and ongoing support helping our clients to instill and adhere to sound data management processes.
- ▶ Evaluate multiple cloud data deployment options and recommend the optimal way to ensure business success while mitigating risks.
- ▶ Report and escalate to leadership as needed and cultivate relationships with client stakeholders
- ▶ Develop a forward-looking hybrid cloud data architecture that will enable efficient transaction processing, dynamic reporting, and predictive analytics

Your Qualifications

Ideally, your background, skills, and capabilities include:

- ▶ Bachelor's degree
- ▶ Creative thinking and collaborative problem-solving skills
- ▶ Passion for personal, client, and team success
- ▶ Strong written, verbal, presentation, and interpersonal skills
- ▶ Cloud data deployment, preferably Azure & AWS
- ▶ Experience in data vault design methodology
- ▶ Motivation to apply digital transformation and related technologies
- ▶ Experience working with PII Data private and sensitive personal information

- ▶ 3 or more years participating in Agile projects and driving Agile transformations from strategy to implementation
- ▶ Experience coaching team members, and other stakeholders, on Data Management and Agile concepts and practices
- ▶ U.S. citizenship or permanent residence, and authorization to work in the United States on a full-time basis without restriction
- ▶ Experience in establishing data management process, framework, and guidelines.
- ▶ Experience in designing SQL and NoSQL databases
- ▶ Experience in Azure Data toolset like ADF, Azure Data Lake, Elastic Pool

Why You Will Love Joining Our Team

You will join a team that is passionate about the success of its clients and people. We lead with a culture of innovation, collaboration, excitement, empowerment, and integrity that encourages our people to excel. We seek people who love what they do for a living, are active contributors, and welcome other points-of-view. In our view, excellence and innovation cannot be achieved without a diversity of thought, perspectives, experience, and backgrounds, and we strive to develop a team-based culture that offers everyone an opportunity to continue to learn and expand their comfort zones to achieve their professional and personal goals.
